**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18 and 48-50, drawn to a bioadhesive composition formed by polymerizing an ionic monomer, a plasticizer, a non ionic monomer and water, classified in class 424, subclass 443.
  - II. Claims 19-47 and 51, drawn to a bioadhesive composition formed by polymerizing an ionic monomer, a plasticizer, a non ionic monomer, water, a surfactant and a hydrophobic monomer, classified in class 424, subclass 448.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not related, because the presence of the surfactant and hydrophobic monomer in Group II causes the reaction mixture to separate into a multiphase structure, whereas the mixture of Group I maintains a monophase structure.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1615

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
